

A nice thesis title – Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.

Student 1 and Student 2

Master's dissertation submitted to obtain the academic degree of Master of Science in Some Discipline

Supervisors

Prof. Aa Bbbb, Ph.D. and Prof. Cc Dddd, Ph.D.

Counsellor

Ee Ffff, Ph.D.

Academic year XXXX-YYYY

Confidential up to and including dd/mm/20yy

Important

This master's dissertation contains confidential information and/or confidential research results proprietary to Ghent University or third parties. It is strictly forbidden to publish, cite or make public in any way this master's dissertation or any part thereof without the express written permission of Ghent University. Under no circumstance may this master's dissertation be communicated to or put at the disposal of third parties. Photocopying or duplicating it in any other way is strictly prohibited. Disregarding the confidential nature of this master's dissertation may cause irremediable damage to Ghent University.

The stipulations mentioned above are in force until the embargo date.

Explanation regarding the master's thesis and the oral presentation

This master's dissertation is part of an exam. Any comments formulated by the assessment committee during the oral presentation of the master's dissertation are not included in this text.

I. INTRODUCTION

II. METHODS

A. Method 1

a. Principle

The Maxwell stress tensor $\bar{\bar{T}}_M$ is given by:

$$\bar{\bar{T}}_M = \bar{B}\bar{H} - \frac{1}{2}\mu_0 H^2 \bar{\bar{I}} \quad (1)$$

where $\bar{B}$, $\bar{H}$ are the magnetic flux density and field strength respectively and $\bar{\bar{I}}$ is the unity tensor.

The expression (1) has been derived by L. Mmm [1] and is widely used [2], [3].

b. Example

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat. See Table I

Table I: A Simple Table

x	y
1	2

Table II: A table with subtables

a: Part a

x	y	z	u
100	200	300	400

b: Part b

x	y	z	u
500	600	700	800

In Figure 1, four subfigures are shown:

1. Figure 1a
2. Figure 1b
3. Figure 1c
4. Figure 1d

a: Subfigure a

b: Subfigure b

c: Subfigure c

d: Subfigure d

Figure 1: A figure with subfigures – Lorem ipsum dolor sit amet, consectetur adipiscing.

In Table II we see two subtables:

1. Table IIa
2. Table IIb

B. Method 2

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequae doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguere possit, augeri amplificarique non possit. At etiam Athenis, ut e patre audiebam facete et urbane Stoicos irridente, statua est in quo a nobis philosophia defensa et collaudata est, cum id, quod maxime placeat, facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et.

See [4] and [5] for more explanation.

Theorem 1: A very short theorem

$$x = y \Leftrightarrow y = x$$

According to Theorem 1, ...

III. CONCLUSION

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequae doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguere possit, augeri amplificarique non possit. At etiam Athenis, ut e patre audiebam facete et urbane

Stoicos irridente, statua est in quo a nobis philosophia defensa et collaudata est, cum id, quod maxime placeat, facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet, ut et voluptates repudiandae sint et molestiae non recusandae. Itaque earum rerum.

Introduction

Chapter 1

Introduction to the Subject

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequae doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut.

This is the first occurrence of the term Degree of Freedom (DOF).

This is the second occurrence of the term DOF or in plural: DOFs.

Single references:

Chapter 2 Appendix A Equation 1.3 Equation A.1 Section 1.2 Theorem 2.3

Some examples of references to lists:

The basics are explained in Chapters 1 and 2.

In Sections 1.1 and 1.2, it will be shown that ...

The equations are explained in more detail in Appendices A, B, and C.

1.1 Context

$$\cos^2 \alpha = \frac{1 + \cos 2\alpha}{2} \quad (1.1)$$

$$\cos(2\alpha) = \cos^2 \alpha - \sin^2 \alpha \quad (1.2)$$

$$\cos \alpha \cos \beta = \frac{1}{2}(\cos(\alpha + \beta) + \cos(\alpha - \beta)) \quad (1.3)$$

Example of ref-list:

ref-list((<eq:cos2alpha>, <eq:cosalphabeta>), <eq:sin2alpha>) show ... gives:

Equations 1.1–1.3 and A.1 show well-known trigonometric formulas.

Example of ref-range:

ref-range(<eq:cos2alpha>, <eq:cosalphabeta>) ... gives:

Equations 1.1–1.3 ...

In Appendix A you find some more, in particular in Section A.1, e.g. Equation A.1

1.1.1 The First Subsection

See [1] and [2] for some more explanation.
